## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-6, 8-18 rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pub. WO 03/015424 A2 to Woodgate et al (hereinafter Woodgate).

Woodgate discloses in figure 21 and pages 36-38, a lens structure for a directional display apparatus comprising:

- A birefringent lens array (134) capable of directing light of a given polarization into a directional distribution, the birefringent lens comprising a solid, first birefringent material and an isotropic material having an interface having a refractive structure;
- A second birefringent material adjacent to the first wherein a microstructure alignment mechanism is present (surface relief structure is disclosed).

As to claims 2 and 17, the material is switchable (abstract).

As to claim 3, the polarization is switchable (abstract).

As to claims 4-6 and 8-9, the alignment microstructure may be configured as claimed by surface relief, rubbed polyimide, or electro-magnetic means.

As to claim 10, the lens structure is arranged to receive light from the pixels of a spatial light modulator.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Woodgate as applied to claims above.

Woodgate discloses the invention as claimed, except for a spacer integrated with the first birefringent material.

It is respectfully noted that spacers, notches and various integrated mechanisms are well known in the alignment art (References cited as pertinent art below; More can be supplied if requested). Such provisions are used to set thicknesses and prevent movement to reduce optical errors.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide and at least have motivation to attempt for an alignment means such as a spacer or protrusion to prevent two layers from shifting to reduce optical errors.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
